SUMMARY

Software Engineer with 5+ years building and maintaining complex, production-grade systems using Node.js, Python, TypeScript, React, and AWS. Currently leading client-facing solution delivery as Lead AI Engineer, including ETL pipelines and cloud infrastructure. Experienced in system design, API development, and cross-functional Agile delivery. MS CS, IIT Chicago.

EDUCATION

Illinois Institute of Technology

Master of Science, Computer Science

Chicago, IL

Aug. 2022 – May 2024

P. E. S. Modern College of Engineering

Bachelor of Science, Computer Science

Pune, MH

May 2017 – Jul. 2021

EXPERIENCE

24x7 ESI

Lead AI Engineer

New York, NY

Apr. 2026 – Present

- Lead end-to-end delivery of enterprise insurance solutions, translating client business requirements into technical specifications and coordinating execution across cross-functional and offshore teams.
- Designed and provisioned AWS cloud services and infrastructure supporting production client applications, owning configuration, reliability, and operational health.
- Built and maintain ETL pipelines for ingesting, transforming, and validating enterprise insurance data, ensuring data quality and consistency across distributed client systems.
- Developed backend services and full-stack applications from scratch and shipped them to production, owning the complete software development lifecycle.
- Maintain production servers and databases across client environments, monitoring performance and resolving operational issues as primary technical point of contact.

Zimopia Technologies Inc. (Talisman Platform)

Software Engineer

Chattanooga, TN (Remote)

May 2025 – Apr. 2026

- Designed and implemented scalable backend services and distributed system workflows using Node.js, GraphQL, and AWS infrastructure (Lambda, AppSync), shipping 50+ production releases through CI/CD pipelines with automated regression testing.
- Engineered modular, maintainable application components using OOP principles and TypeScript, reducing duplicated logic by 25% and improving long-term system maintainability.
- Designed RESTful APIs and backend data pipelines integrating application services with distributed databases (MariaDB, Neo4j, PostgreSQL), reducing system data-load errors by 30%.
- Led system-wide architectural improvements implementing Redux and IndexedDB for state and data persistence, reducing production defects by 81% and improving overall system reliability in production.

Grantaide

Full Stack Developer

San Francisco Bay Area (Remote)

May 2024 – May 2025

- Built and deployed AI-integrated systems using Python, Node.js, and TypeScript on AWS (S3, Amplify, EC2), integrating GPT-4 APIs into production workflows; architected RESTful services with Flask and Firebase Firestore and mentored junior engineers through code reviews.

Aiolos Cloud Solutions Pvt. Ltd.

Junior Software Developer

Mumbai, India

Mar. 2021 – Jul. 2022

- Built scalable full-stack systems using React, Node.js, Redux, and MongoDB, designing RESTful APIs and data models that improved platform user engagement by 60%.

Boss Global Pvt. Ltd.

Software Development Intern

Pune, India

Jan. 2020 – Feb. 2021

- Developed a cross-platform productivity tracking application in C, React, and Electron on AWS, building data parsing utilities and Firebase integrations.

SKILLS

Languages: Python, JavaScript, TypeScript, Java, C, HTML5, CSS3

Frameworks & Libraries: Node.js, Express.js, GraphQL, Flask, React.js, Next.js, Redux, Vue.js, Angular

Cloud & Data: AWS (Lambda, EC2, S3, Amplify, AppSync), ETL Pipelines, PostgreSQL, MySQL, MongoDB, MariaDB, Neo4j, DynamoDB, Firebase

Tools & DevOps: Docker, Git, Jenkins, CI/CD, Jira, Agile, Cursor, Traycer, Co-pilot, PostHog
